

Disaster Evacuation

Earthquake

DROP, COVER, HOLD

Forest Fire

Tsunami

Quake Long & Strong
Get Gone

Tidal surge

In the event of any of the above occurring in a way that threatens the safety of those staying or living at camp it may be necessary to evacuate the camp.

- Evacuate buildings using fire evacuation procedures.
- Evacuate site to safe area, at least the main highway (1) or further west if necessary.

(Civil Defence recommend that in the event of an Earthquake that rolls for more than a minute OR makes it hard to stand up, don't wait for a tsunami warning the site should be evacuated).

- If evacuation is ordered ring the council (on 311 8900 which is monitored 24/7) and let them know what you are doing, how many you have, that you need transport assistance if possible and the route you are going to walk.
- The closest Civil Defence outpost is situated at Woodend Community Centre.
- Further instructions would be given by local emergency services or council and should also be available on radio (Compass FM 104.9 or Radio NZ National Program 675AM or 101.7 FM).
